

Potential Predictive Variables for Migratory Habitat Model			
<i>Soil Variables</i>	<i>Land Cover</i>	<i>Landscape Configuration</i>	<i>Forest Structure Variables</i>
Soil drainage class 	LANDFIRE land use/land cover (point and buffered) 	Landcover-specific edge coefficient 	LIDAR understory voxels 
Topographic wetness index	LANDFIRE forest type (point and buffered) 	General edge coefficient 	LIDAR canopy cover
Soil texture		Class level landscape configuration (ex. mean size of forest patches within 200m)	LANDFIRE canopy cover
		Landscape level landscape configuration (ex. contagion)	LIDAR canopy height
